

STEP 4

Task: Create a website for your company using HTML and CSS.

1. Include in your website: About Us, Products, and Contact Us
2. About Us - should contain important information from your business plan
3. Products or Services - List the types of products or services and the prices
4. Contact Us - You shouldn't use your real information here.
5. Include pictures and/or videos
6. Ensure you use the methods and skills taught in HTML & CSS
7. Look at other websites and ensure you have all the information a customer would need to find on your website
