

BTT101 –Webpage Assignment

Task: You will create a webpage about yourself using the tools you've learnt from the Khan academy lessons. Your website will include:

- A mission statement at the top of the webpage (include border and background colour)
- Table of contents (Hint: internal link)
- A short description about yourself
- A picture that reflects you (find a picture from the internet)
- Your school timetable with a border
- A link to your favourite website including a picture and a description explaining why you like the website
- A link to your favourite restaurant including a picture and a description explaining why you like the website
- A list of 10 unique facts about yourself (likes, dislikes, experiences, etc.)
- Message at the bottom of your page with a text effect (google the code for the text effect)

Instructions:

1. Open a notepad
2. Write your code neatly inside the notepad
3. Save the notepad with the extension .html (For example, click save as, type Student.html, and press save)
4. This will save it as a website
5. Also save your website as a txt. File (a notepad file) so you can edit your website. Every time you edit your website you will have to re-save your website as an html
6. Upload it to google classroom as an attachment in the assignment link
